

# SQL Safe Backup Home

## Hands-free backup across your SQL Servers

- **Save time.** Back up faster than native SQL with dynamic compression
- **Reduce failures.** No disruption during network outages
- **Automate.** Full, differential, and transaction log backups
- **Enterprise management.** Scalable, centralized console and repository
- **Save space.** Intelligent compression across SQL versions
- **Instant restore.** Immediate access to backup data without waiting for a lengthy restore

*SQL Safe Backup hands-free backup and instant recovery across your SQL Servers.*
