

SQL Secure 2.8 Home

See who has access to what and how permissions are granted

- **Identify existing vulnerabilities** in your SQL Servers
- **Harden security policies** across SQL Servers
- **Rank security levels** with the security report card
- **Analyze and report user permissions** across SQL Servers
- **Customizable templates** for PCI, HIPAA and more

SQL Secure tells you who has access to what on your SQL Server databases. [Learn more >>](#)
