

Edit Event Filter wizard - SQL Server Event Source tab

The SQL Server Event Source tab of the Edit Event Filter wizard allows you to change which user (SQL Server login) or application is initializing the SQL Server event you want to filter from your audit data.

SQL Server Event Source
This window allows you to select the users and applications that initiated the filtered events.

Filter events generated by:

- Application Name
- Login Name
- Hostname
- Is Privileged User
- Session Login

Edit filter details (click on an underlined value)

Filter all DML events on any SQL Server and database master where Login Name like 'sa'

< Back Next > Finish Cancel

Available actions

Select the user or application to filter from your audit data

Allows you to select the specific software application, computer, or SQL Server login you want to filter from your audit data. You can also filter privileged user events.

When the Collection Server processes an audited event that was initiated by the specified application, computer, or user, the filter is run to see whether the identified event matches the other filter criteria.

Edit filter details

Allows you to change your specified criteria at any time as you edit your filter. As you specify criteria using the Edit Event Filter wizard, the filter details change to reflect these new settings. To edit previously set criteria, click the corresponding setting.
