- [Version 3.1.200](#)
- [Version 3.1](#)
- [Version 3.0](#)
- [Version 2.9](#)
- [Version 2.8](#)

Version 3.3.1

There are no new features for this product version release.

Version 3.3

- Adds audit support for Amazon RDS and Amazon EC2
- Installs on Azure VM and Amazon EC2
- Added security checks to support GDPR and provide GDPR policy template
- Updated IDERA level 1 to 3 policy templates
- Enhanced import and export policy
- Added an option to make bulk changes to email notification settings
- Archive snapshots for decommissioned servers

Version 3.2

- Added security templates
- Updated security templates
- Added configuration checks
- Added access checks
- Added auditing checks
- Added login checks
- Added permissions checks

Version 3.1.200

- Reference decommissioned server instance snapshots
- Supports TLS 1.2
- New product versioning

Version 3.1

- Supports auditing of Azure SQL Database and SQL Server running in Azure virtual machines
- Expands installation options
- Moved to Windows .NET Framework 4.6

Version 3.0

- Added SQL Server file import
- Added tags for easier server management
- Added suspect SQL Server logins report
- Expanded Risk Assessment reporting

Version 2.9

- Improved name matches selection of rule filter properties
- Enhanced reporting
- Supports SQL Server 2016
- Updated guest user enabled access functionality

Version 2.8

- Supports SQL Server 2014

- Supports Always On Availability Groups
- Install repository on a failover cluster
- Updated policy templates to use latest versions of SQL Server and OS
- Updated to a granular process for exporting and importing policies
- Improved process for registering new SQL Server instances
- Supports sequence objects for SQL Server 2012
- Supports users in contained databases for SQL Server 2012 and 2014
- Added security checks
