

Manage Instances

The IDERA Dashboard tracks SQL Server instances, discovered and managed by different IDERA products. The Instances section of the Administration view allows users to view and delete registered instances.

To view coverage or remove registered instances that no longer exist in your SQL Server environment, either select **Manage Instances** from the Administration menu or click **Manage Instances** on the Administration view, and the Managed Instances window displays. The View filter allows you to select from:

- **All:** Lists all instances discovered in your SQL Server environment and network.
- **Managed:** Lists only those managed instances in various IDERA products.
- **Unmanaged:** Lists instances discovered on the network but not registered.
