

Release notes

Idera SQL Comparison Toolset is a bundle of two products, Idera Schema Compare and Idera Data Compare. While Schema Compare allows you to compare database schemas and propagate schema changes from one environment to another, Data Compare lets you compare and synchronize tables across servers, databases, and versions when performing data migrations, copying databases, or auditing data.

To get a quick glimpse into the newest features, fixed issues, and known issues in this release of Idera SQL Comparison Toolset, review the following sections of the Release Notes:
