## **Groom Alerts Now window**

The Groom Alerts Now window allows you to groom alert messages currently stored in the Repository databases. Grooming permanently deletes any alert message that is older than the age limit you specify.

Audited SQL Servers	Groom Alerts Now				

## Available fields

## SQL Servers

Allows you to select which SQL Server instance you want to groom. You can groom alerts for all registered SQL Server instances or for a particular SQL Server instance.

## **Grooming Options**

Allows you to specify the age (in days) at which an alert message should be groomed. The Collection Server does not groom alert messages that are younger than the specified age.
