

Edit Data Alert Rule wizard - Data Alert Type tab

The Data Alert Type tab of the Edit Data Alert Rule wizard allows you to change the criteria of this alert rule by editing its parameters in the **Edit rule details** pane.

The screenshot shows the 'Edit Data Alert Rule' wizard window. The title bar says 'Edit Data Alert Rule'. The main area is titled 'Data Alert Type' with the instruction: 'Define the rule that will alert on Sensitive Column access or Before After Data change. Click Next to continue.' Below this is a 'Rule Type:' dropdown menu set to 'Sensitive Column Accessed'. A 'Description' box contains the text: 'This alert will be generated when a column has been read that has been setup for Sensitive Column Auditing.' Below the description is a section titled 'Edit rule details (click on an underlined value to edit)'. This section contains the text: 'Generate a Medium alert when a Sensitive Column is accessed on any SQL Server'. At the bottom right are three buttons: 'Previous', 'Next' (which is highlighted with a blue border), and 'Cancel'. On the left side of the wizard, there is a blue vertical bar with a white document icon and a blue diamond icon with a white exclamation mark.

Available actions

Edit rule details

Allows you to change your specified alert rule criteria at any time as you create your new alert rule. As you specify criteria using the Edit Data Alert Rule wizard, the rule details grows to include these additional settings. To edit previously set criteria, click the corresponding setting.
