# **Alert Activity - Data Report**

The Alert Activity - Data Report shows SQL Compliance Manager data alert activity in your monitored environment. Use this report to identify and investigate data manipulation on specific databases, tables, or columns.

A filter can include a list of wildcards, separated by commas, where a wildcard is a string, which may contain asterisks. The following parameters are specific to the selected report and enable you to filter the data to include in the report.

# **Available actions**

#### Server Instance

Allows you to select a registered instance on which you want to report. Select ALL to report on all instances.

# **Databases**

Allows you to select or type the name of one or more databases on which you want to report.

# **Table Name**

Allows you to select or type the name of one or more table names on which you want to report.

#### Login

Allows you to select the login from the drop down list of available logins. Select ALL to report on all logins.

# **Start Date**

Allows you to select the start date for the range from which you want to report.

#### End Date

Allows you to select the end date for the range from which you want to report.

# Start Time - Hour

Allows you to select the exact starting hour of the day for the range from which you want to report.

#### Start Time - Min

Allows you to select the exact starting minute of the day for the range from which you want to report.

# Start Time - AM/PM

Select between AM or PM from the drop down list to configure the Start Time for Each Day range from which you want to report.

#### **End Time - Hour**

Allows you to select the exact ending hour of the day for the range from which you want to report.

#### **End Time - Min**

Allows you to select the exact ending minute of the day for the range from which you want to report.

#### Fnd Time - AM/PM

Select between AM or PM from the drop down list to configure the End Time for Each Day range from which you want to report.

# **Schema**

Allows you to type the name of the schema on which you want to report.

#### **Application**

Allows you to type the name of one or more applications on which you want to report.

#### Host

Allows you to type the name of one or more hosts on which you want to report.

#### **Show SQL**

Select between True or False from the drop down menu to filter the report by SQL Text.

# Alert Level

Choose to filter alerts by their different levels; Severe, High, Medium, or Low.

# **Run Report**

Click this button to Run the report.

# **Default columns**

# Time

The Time column displays the date and time when the event was captured.

# **Alert Level**

The Alert Level column displays the level the alert is configured to.

#### Event

The Event column provides the name of the audited event that triggered this alert.

# Login

The Login column displays the login name of the user who performed the event.

#### Host

The Host column displays the name of the host.

# **Application**

The Application column displays the name of the application used to capture the event.

# **Database**

The Database column displays the name of the database where the event was captured.

# **Schema**

The Schema column displays the name of the event's schema.

#### **Table Name**

The Table Name column displays the name of the table were the event was captured.

# **Details**

The Details column provides the first line of the alert message associated with this alert.

# SQL

The SQL column when set to True, provides the SQL Statement for the captured event.
