Get a quick overview of enterprise health

Use the **All Servers** tab on the Dashboard view to quickly see the overall health of each registered server, based on the last analysis run. Also, it shows you a recommendation summary from the latest analysis and from this tab, you have access to quick links to different actions or settings for your monitored SQL Server.

Quick Links	Tasks
	Analysis Results
	Sessions
	Waits
	Query plan stats
	Analyze Server
	Diagnose Queries
	Settings

SQL Doctor displays the registered server status in its own pane with links to the corresponding tasks.
