

Get disk information

The Disks tab of the Files view provides a graphical representation of your current disk usage. Select the drop-down list above the chart to choose from the following chart types:

- Megabytes
- Percent

You must have OS metrics enabled to show the information in the charts on the Disks tab.

Access the Disks tab

To open the Disks tab of the SQL Diagnostic Manager Databases Files view, select the appropriate SQL Server instance, click **Databases**, select **Files**, and click the **Disks** tab.
