

New features and fixed issues

SQL Boost provides the following new features and fixed issues.

2.9 New features

Easily collect compression statistics for reporting

You now can collect compression and bandwidth statistics to more easily build a report showing the value SQL Boost provides to your organization. This feature also allows you to track network usage for your SQL data traffic, which can aid in current and future bandwidth planning.

2.9 Fixed issues

There are no fixed issues in this release.
