

Known Issues

- [Version 3.0](#)

IDERA strives to ensure our products provide quality solutions for your SQL Server needs. The following known issues are described in this section. If you need further assistance with any issue, please contact [Support](#).

IDERA Dashboard issues

- Upgrades overwrite custom keystore files.
- Overview displays SQL Diagnostic Manager widgets even when that product is not registered to the Dashboard.
- Details View does not display any managed instances.
- Details View does not retain and display added widgets.
- Alerts view does not display the correct alert description and the More Details and Goto Product Dashboard links do not work.
- Alerts view does not display detail for the Sample product.

SQL Diagnostic Manager issues

- After upgrading to SQL Diagnostic Manager 10.2.1, it is necessary to stop and restart all the SQLDM and the IDERA Dashboard services.

[IDERA Dashboard](#) provides an integrated user experience for the IDERA products in your environment.
