## **Ensure the SQL Compliance Manager Agent has current audit settings**

You can ensure the SQL Compliance Manager Agent is using your most recent audit settings by performing a manual update. This update does not impact the heartbeat interval. By default, the agent receives updates every five minutes.

## To ensure the SQL Compliance Manager Agent has current audit settings:

- 1. Navigate to Registered SQL Servers in the Administration tree.
- 2. Select the SQL Server instance to which you want to update the SQL compliance Agent.
- 3. Click Update Now on the Audit Settings ribbon.

SQL Compliance Manager monitor, audit and alert on SQL user activity and data changes.
