

Check the SQL Compliance Manager Agent version

You can quickly check the version of a SQL Compliance Manager Agent that is deployed to a registered SQL Server instance you are auditing. The SQL Compliance Manager Agent version consists of the release number and build number assigned to SQL Compliance Manager. The SQL Compliance Manager Agent version should be the same as the product version. For more information, see [Check the product version](#).

To check the SQL Compliance Manager Agent status:

1. Navigate to **Registered SQL Servers** in the **Administration** tree.
2. Select the SQL Server instance that hosts the SQL Compliance Manager Agent you want to check.
3. On the Agent menu, click **Agent Properties**.
4. On the General tab, review the SQL Compliance Manager Agent version number, and then click **OK**. For more detailed information to help troubleshoot an issue, see additional agent properties on the Deployment and Trace Options tabs.

SQL Compliance Manager monitor, audit and alert on SQL user activity and data changes.
