

Administer SQL Compliance Manager

The **Administration** tab gives you easy access to manage IDERA SQL compliance Manager options such as users, licenses, and instances, which all must be added to SQL Compliance Manager if they are not already added.

For more information about each option and what configuration settings are available for you, go to each respective topic:

- [Managing users in SQL Compliance Manager](#)
- [Manage licenses](#)
- [Adding SQL Server instances](#)
- [Import SQL Server instances](#)
- [Manage SQL Server Instances](#)
- [Configure Web Console refresh rate](#)

SQL Compliance Manager monitor, audit and alert on SQL user activity and data changes.
