

View the event that triggered an alert

You can use the Management Console to view the properties of the SQL Server event that triggered a given alert.

To view the event data for an alert:

1. Select **Audited SQL Servers** or an individual SQL Server instance in the **Explore Activity** tree.
2. On the **Alerts** tab, right-click the alert for which you want to view event details, and then select **Event Properties** on the context menu.
3. Review the event details, and then click **Close**.

SQL Compliance Manager monitor, audit and alert on SQL user activity and data changes.
