

Specify policy properties

The **Name the Policy** section allows you to give your policy a name and a description. It is important to give your policies easily identifiable names and provide descriptions that help you select the appropriate policy during audits. The policy name and description can be changed later using the [Policy Properties](#) window.

The screenshot shows a window titled "SQL Secure Create Policy" with a standard Windows title bar (minimize, maximize, close buttons). The window has a header bar with a green checkmark icon and the text "SQL Secure Create Policy". Below the header, the section is titled "Name the Policy" with a subtitle "Specify a name and description for this new policy." and a globe icon with a green plus sign. The main area contains two input fields: "Name" with the text "CIS for SQL Server 2019" and "Description" with the text "Center for Internet Security - Security Configuration Benchmark for Microsoft SQL Server 2019, v1.0.0, November 27, 2019". At the bottom, there are four buttons: "< Back", "Next >" (highlighted with a blue border), "Cancel", and "Help".

Click **Next** to go to the [Configure the Policy](#) Section.
