

# Licensing Report

Provides an overview of the SQL Licensing information of the managed instances within SQL Inventory Manager. This report displays information from the [SQL Server Licensing by Instance view](#), it also contains additional columns for custom inventory fields and tags on the managed instances. Refer to [IDERA Reports Utility](#) for information on how to deploy or remove this report.

 Microsoft SQL SERVER licensing information provided within IDERA SQL Inventory Manager is based on your system information and is only for guidance.

The Licensing report offers the following information.

## SQL Server

The SQL Server instance name.

## Version

The SQL Instance version number.

## Edition

The SQL Server Instance edition number.

## Virtual

Whether it is a virtual server or not, possible values are **yes** or **no**.

## CPU Name

The name of the installed CPU.

## # of Sockets

The number of sockets available on the server.

## # of Logical Processors

The number of logical processors installed on the server.

## # of Cores

The number of available cores on the Instance.

## Core Factor

Displays a numerical value that determines the number of core licenses necessary. While an administrator can change this value in the Core Factor Table, this number is provided by Microsoft based on the CPU in use.

## Possible Core Licenses

Displays the product of the total number of cores on a system multiplied by the Core Factor.

## Fully Licensed with SA

Whether the instance is fully licensed with SA or not. Value is represented with a checkbox.

## **Custom Inventory Fields for Instances**

Any custom inventory fields in the server
