

Finalizing SQL Workload Analysis Storage configuration

To finalize SQL Workload Analysis configuration:

1. Login to the server on which SQL Workload Analyzer is installed.
2. Navigate to SQL Workload Analyzer installation folder.
3. Execute: `setup.exe`.
 - a. Select an SQL Server instance and click the **Configure** button.
 - b. Click **Next** button until getting to the EMC Storage tab.
 - c. Check the **Enable EMC storage visibility** checkbox.
 - d. Click the **Next** button.
4. You should start seeing EMC storage statistics in SQL Workload Analyzer GUI in 45 minutes.
