

Log in to the IDERA Dashboard

Once you have installed and configured your IDERA Dashboard and SQL Workload Analysis deployments, you can log in to the web console by doing the following:

1. Open your selected Browser. Make sure it is compatible with the IDERA Dashboard [console requirements](#).
2. Type the IDERA Dashboard product URL: **http://<machinename>:<port>** where **<machinename>** is the name of your host or machine, and **<port>** is the port specified during installation. The default URL is **http://<localhost>:9290** or **http://<machinename>:9290**.
3. When the IDERA Dashboard web console launches on your browser, use your Windows user account **<domain\user>** with the respective password to log in to the product.

The image shows the IDERA Dashboard login interface. At the top is the IDERA logo, with 'IDERA' in a serif font and a green horizontal bar between the 'E' and 'R'. Below the logo are two input fields: the first is labeled 'Domain\Username Credentials' and the second is labeled 'Password'. Below these fields is a large, dark blue 'Log in' button. At the bottom of the form is a link that says 'Log on using Windows Credentials'.
