Installation instructions

This procedure guides you through a typical install of SQL Workload Analysis integrated with the IDERA Dashboard.

- The SQL Workload Analysis installation kit provides users with a unified installer for both products: IDERA Dashboard and SQLWA.
- IDERA recommends running the unified installer. See Install the IDERA Dashboard and SQL Workload Analysis for detailed instructions.

Installation prerequisites

- The user must have a local administrator account.
- Microsoft .NET Framework 4.5 or later must be installed prior to beginning installation.
