

Storage

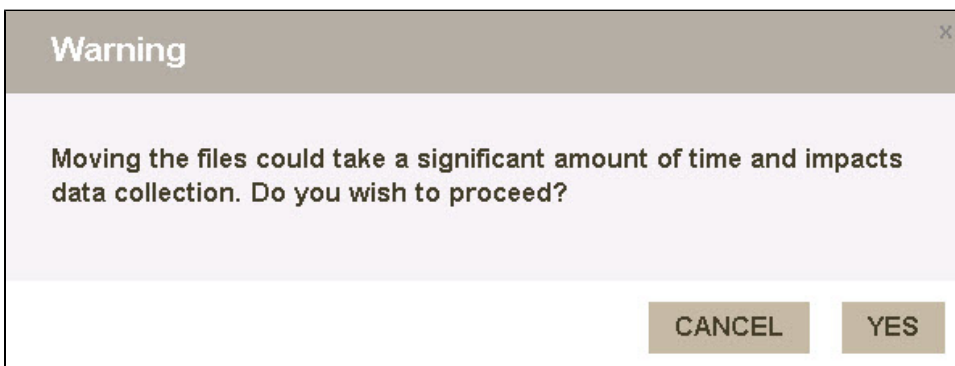

This option helps you to change the storage location of SQL Workload Analysis database and message queue files for proper distribution. To change the location, follow these instructions below:

1. Click **Relocate Database/ Message Queue Files**.

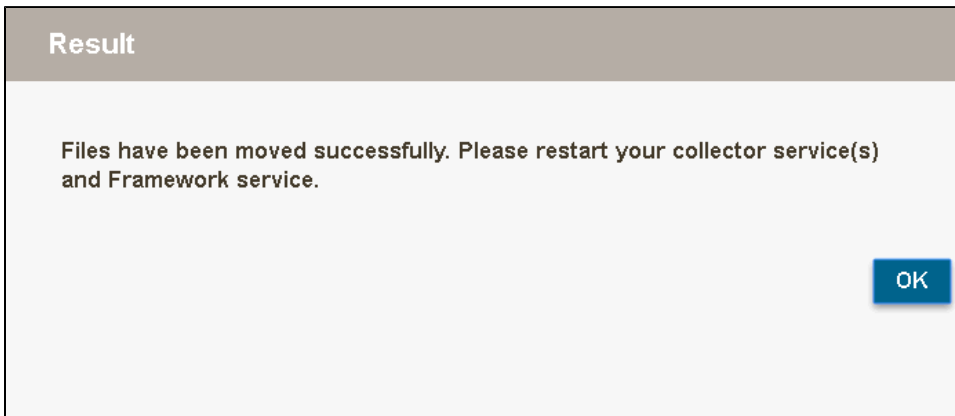

The dialog box titled "Relocate Database/Message Queue Files" has a header bar with a question mark and a close button. It contains two rows of input fields. The first row is labeled "Data File Storage:" and contains a text box with the path "C:\Program Files\idera\IDERA SQL Woi" and a "BROWSE" button. The second row is labeled "Message Queue Storage:" and contains a text box with the same path and a "BROWSE" button. At the bottom right, there are "CANCEL" and "SAVE" buttons.

2. Click **BROWSE**, to select a new location for the Data File Storage.
 3. Click **BROWSE**, to select a new location for the Message Queue Storage.
 4. Once you finish editing the new locations, click **SAVE**. If you do not want to save the changes, click **CANCEL**.
- After saving your changes, a Warning message shows up asking if you want to proceed or cancel.

The warning dialog box has a title bar with the word "Warning" and a close button. The main text area contains the message: "Moving the files could take a significant amount of time and impacts data collection. Do you wish to proceed?". At the bottom right, there are "CANCEL" and "YES" buttons.

5. Once SQLWA finished to move the files to the new locations, a message shows up confirming the results of the operation. Click **OK**.
