

Upgrading using the CLI utility

To apply the upgrade

1. Run the CLI i3-update-load command to load the upgrade.zip file:

Windows `infra\bin\psin_cli.bat`
 `-action i3-update-load`
 `-i3-user admin`
 `-i3-clear-password admin`
 `-zip-file Precise DVD\Upgrade to v9.9.0\Upgrade.zip`

UNIX `./infra/bin/psin_cli.sh`
 `-action i3-update-load`
 `-i3-user admin`
 `-i3-clear-password admin`
 `-zip-file Precise DVD\Upgrade to v9.9.0\Upgrade.zip`

2. Run the CLI i3-update-prepare command to prepare the update:

Windows `infra\bin\psin_cli.bat`
 `-action i3-update-prepare`
 `-i3-user admin`
 `-i3-clear-password admin`
 `{-servers "<servers>" | -all-servers true}`
 `-updates-ids V990_UPGRADE`

UNIX `./infra/bin/psin_cli.sh`
 `-action i3-update-prepare`
 `-i3-user admin`
 `-i3-clear-password admin`
 `{-servers "<servers>" | -all-servers true}`
 `-updates-ids V990_UPGRADE`

3. Run the CLI i3-update-install command to apply the update:

Windows `infra\bin\psin_cli.bat`
 `-action i3-update-install`
 `-i3-user admin`
 `-i3-clear-password admin`
 `{-servers "<servers>" | -all-servers true}`
 `-updates-ids V990_UPGRADE`

UNIX `./infra/bin/psin_cli.sh`
 `-action i3-update-install`
 `-i3-user admin`
 `-i3-clear-password admin`
 `{-servers "<servers>" | -all-servers true}`
 `-updates-ids V990_UPGRADE`

4. Perform the post-update action items that appear.
