

Server monitor reports

Server monitor reports provide an overview of your monitored SQL Server instances.

Server Monitor Reports

Enterprise Summary

Use the [Enterprise Summary](#) report to view the health of your SQL Servers.

Server Summary

Use the [Server Summary](#) report to view the health of a single SQL Server.

Active Alerts

Use the [Active Alerts](#) report to identify the currently active alerts for all monitored SQL Servers.

Mirroring Summary

Use the [Mirroring Summary](#) report to view the health of your mirrored databases.

Metric Thresholds

Use the [Metric Thresholds](#) report to view all metric thresholds for a SQL Server instance.

Availability Group Topology

Use the [Availability Group Topology](#) report to view the current topology of an AlwaysOn Availability Groups configuration.

Deadlock Report

The [Deadlock Report](#) lets you analyze deadlocks on your SQL Server instance. By analyzing you can better determine where deadlocks are occurring and what changes can have the greatest performance impact.

Alert Template Report

The [Alert Template Report](#) displays the list of instances with Alert Template assigned per instance.

Alert Threshold Report

The [Alert Threshold Report](#) displays all the metrics thresholds of the selected server.

Template Comparison

The [Template Comparison Report](#) displays all the metrics thresholds differences between the Source and the Target Template.
