

Auditing SQL Enterprise Job Manager Logs

The **Audit Log** tab records all the changes done through SQL Enterprise Job Manager and captures them in logs.

First Steps

To start using the Audit Log options, you must enable the option on the [Administration Tab](#).

ADMINISTRATION

Users

Give users permission to use SQL Enterprise Job Manager. Create, edit and delete users and subscribe to alerts using the Manage Users action.

Manage Users

Instances

SQL Enterprise Job Manager monitors SQL Server Instances and their host computers. Add instances to be monitored using the Add SQL Server Instance action.

Add Instance

Import SQL Servers

Manage SQL Server Instances

Licensing

A license is required to access SQL Enterprise Job Manager features. View license status and add a license key using the Manage License action.

Manage License

Alert Rules

SQL Enterprise Job Manager displays alerts that warn you about the status of your instances and jobs. These alerts depend on the Alert Rules you can configure and customize according to your requirements.

Manage Alert Rules

Alert Emails

SQL Enterprise Job Manager can send email alerts to inform users about critical issues such as availability problems. To receive alert emails, you must configure alerting to use an email server available on your network and sign up to receive alert emails.
