

Mail Vulnerability

The **Mail Vulnerability** report show all SQL Server instances with SQL Mail stored procedures.

Warning

This report is not applicable to **Azure SQL Database** and **Amazon RDS** for SQL Server instances.

Recommendation

Using the SQL Mail feature from a SQL Server instance represents an increased security risk. To avoid any risks, remove the access to SQL Mail if it is not needed.

Getting Started

Follow these steps to generate this report:

1. Select the Date, Policy, and Baseline options from the Report Settings box.
2. Select a target instance.
3. Click the **View Report** button to generate your report.
