Select the policies you want to import

The **Policies** tab of the Import Wizard lists policies from your policy file. Choose one or more policies from this list to import.

> ⚠ All policies are selected by default.

Use the ▽ filter arrow to order the listed policies by name and type.

Click on the policy name to review its settings.

The progress bar at the bottom shows selected v.s. not selected policies and the total number of policies.

Once you select the policies you want to import, click **NEXT** to review preexisting policies.
