Review the import progress

The **Progress** tab of the Import Wizard displays the status of your policy import.

It also provides the import information and failure file location.

Use the ▽ filter arrow to order the listed policies by status, name, type, and progress.

Click on the ⓘ information icon to view the policy settings.

The progress bar at the bottom shows the successful, failed, importing, and pending status of your imported policies and the total number of policies.

> ⚠ You can Hide or Close this window at any time. However, once the import starts, it cannot be canceled.
