Get started

Use the following checklist to guide you through the process of getting started with IDERA SQL Secure.

•	Follow these steps
•	Register the SQL Server instances whose security models you want to assess and audit.
•	Configure snapshots to collect audit data from the registered instances.
•	Find security issues using the default All Servers policy.
•	Create custom policies to assess compliance to specific security regulations.
•	Save assessments for policies you want to use in your audit process.
•	Compare assessments to identify changes over time.
•	Perform forensic analysis of your security model using the Permissions Explorer.
•	Discover vulnerabilities using the built-in reports.
