

Reconfigure the existing SQL Safe Backup Agent

1. Open any *SQL Safe Management Console* in your environment.
2. Go to the *SQL Safe Agents* view.
3. Select *All Servers* from the list shown on the left pane.
4. Update the Management Server value for all servers listed on the right pane.
 - a. Double-click on the server name to open the properties window.
 - b. Update the *Management Server* field to the name of the new server hosting the *SQL Safe Management Service*.
 - c. Click *OK* to save the changes.
 - d. Repeat these steps with all servers listed on the *SQL Safe Agents* view.
