## **Reviewing details for manual backup**

When you reach the Finish section of the Backup Wizard, you can go to previous sections and make any necessary changes.

You can also click Generate Script to have SQL Safe generate T-SQL and Command Lines of your backup operation settings.

After you have reviewed the information, click Finish to submit the backup job immediately.

## How do you verify the status of your backup?

If you chose to run the backup job immediately, and want to verify a successful run, you can view its status in the Operation History tab.

SQL Safe is a high-performance backup and recovery solution for your SQL Servers. Learn more > >
