Get Started

Use the following checklist to get started using SQL Safe.

☑	**Follow these steps ...**
☐	Register the SQL Server instances you want to back up and restore.
☐	Deploy Backup Agents to your registered instances.
☐	***If you want to receive alert notifications through e-mail***, configure the e-mail settings.
☐	***If you want the option to use the InstantRestore feature to restore a database***, enable the InstantRestore service.
☐	Determine what your backup and recovery strategy will be.
☐	Determine whether you will perform manual backups of create policies to automate your backups.
☐	Determine which types of compression and encryption are best for your environment.
☐	Determine whether you will use log shipping policies as part of your recovery strategy.
☐	Ensure that you are able to restore the database. You can perform a full backup or you can test your configuration by running a verify-only backup. To perform a verify-only backup, run the Restore Wizard and select the **Verify only** option on the Recovery tab.

SQL Safe is a high-performance backup and recovery solution for your SQL Servers. Learn more > >
