

# Reports requirements

SQL Safe leverages Microsoft SQL Server Reporting Services (Reporting Services) to provide on-the-spot reporting on your backup and restore data. The Report Server computer should meet or exceed the hardware and software requirements recommended by Microsoft to run and manage the Reporting Services components.

SQL Safe supports Reporting Services version 1.0 or later and requires Microsoft Internet Explorer version 6.0 or later. You can generate SQL Safe reports on both 32-bit and 64-bit Report Servers.

SQL **Safe** is a high-performance backup and recovery solution for your SQL Servers. [Learn more](#) > >
