

# Analytic tools

The IDERA SQL Admin Toolset contains the following analytic tools:

## **Index Analyzer**

Analyze the usage patterns of your indexes, including those used most often used and those never used.

## **Inventory Reporter**

Show inventory and configuration details for your SQL Server instances and their host computers.

## **Patch Analyzer**

Find out if your SQL Servers are up to date with the latest available patches.

## **Server Ping**

Continuously monitor the status and availability of your SQL Servers.

## **Server Statistics**

View statistics and counts about your SQL Servers.

## **Space Analyzer**

Analyze the space usage of your SQL Server by drive or database.
