

Release notes

Idera's SQL safe provides a high-performance backup and recovery solution for Microsoft SQL Server. SQL safe saves money by reducing database backup time by up to 50% over native backups and reducing backup disk space requirements by up to 95%. SQL safe also enables complete 'hands-free' automated backup of your entire SQL Server infrastructure and ensures compliance with your organization's backup and recovery policies. From implementations with tens of SQL servers to enterprises with hundreds of servers spread around the globe, SQL safe is the only SQL Server backup and recovery solution that scales to meet the challenge.

To get a quick glimpse into the newest features, fixed issues, and known issues in this release of SQL safe, review the following sections of the Release Notes:
