Change SQL Servers audited by policy

The **Audited SQL Servers** tab allows you to change which registered SQL Server instances are assigned to this policy. You can add or remove instances from this policy to better match your auditing needs. Each registered SQL Server instance can belong to multiple policies.

The **Audited SQL Servers tab** is located in the **Policy Properties** window.

Edit the instance list by either selecting one of the version-group options or by selecting instances specifically, and then click **OK**. SQL Secure automatically re-assesses the policy based on this new scope.

SQL Secure tells you who has access to what on your SQL Server databases. Learn more > >
