Connect to Reporting Services

The **Connect to Reporting Services** section of the **Deploy Reports to Reporting Services** wizard allows you to specify the Report Server to which you want to deploy the IDERA SQL Secure Reports. The Deploy Reports wizard automatically applies connection settings based on a default Microsoft Reporting Services installation. You can use the default connection settings, or specify custom connection settings.

To specify connection settings, click **Show advanced connection options**, and then enter the appropriate settings.

Click **Next** to go to the next section where you can specify the repository as report data source.

⚠ To successfully deploy reports, you must have Content Manager rights on the Report Server. For more information, see the Reporting Services Books Online.

SQL Secure tells you who has access to what on your SQL Server databases. Learn more > >
