Edit login settings

IDERA SQL Secure allows you to edit individual login permissions (to SQL Secure) from the **Manage SQL Secure** view.

To edit SQL Secure login properties:

1. Select **Logins** from the **Manage SQL Secure** view.
2. In the list of Logins, right-click the login you want to edit and select **Properties**.
3. You can edit the **Security Access** properties (Grant or Deny access) or the **Permissions within SQL Secure** (where you decide if the login has Administrator server role or not). Click **OK** to queue your changes. The SQL Secure login has been edited and the new settings will apply the next time the user logs into SQL Secure.

SQL Secure tells you who has access to what on your SQL Server databases. Learn more > >
