View SQL Secure activity

Each time a change or action occurs in IDERA SQL Secure, an event is logged. These logged events appear in the **SQL Secure Activity** view. This log includes collection activity, snapshot configuration changes, SQL Secure login changes, and any other changes made to your SQL Secure settings.

Available event data

The following columns are available in the **SQL Secure Activity** logs:

Column	Description
Type	Displays the type of event that occurred
Date and Time	Displays the date and time when the event occurred
SQL Server	Provides the name of the SQL Server instance where the event occurred
User	Provides the name of the user who initiated the event
Category	Provides the category of the event
Code	Displays a description of the code that is used in the event
Description	Displays a short description of the event

⊘ You can use the options in the upper section of this log to **Select Columns** to display, **Group by Box**, **Save** to an excel file, or **Print.**
