

Ensure FIPS compliance

You can use SQL BI Manager in environments where Federal Information Processing Standard (FIPS) compliance is required. SQL BI Manager automatically detects whether the target SQL Server instances require FIPS-compliant encryption. When this security setting is detected, SQL BI Manager uses the FIPS-compliant AES encryption algorithms provided by Microsoft.

For more information about FIPS compliance, see the corresponding [Microsoft TechNet Web Article](#) and [Microsoft Knowledge Base Article](#).

Ask your Windows security administrator whether the FIPS system cryptography setting has been enabled in the Local Security Policy or a Group Policy that applies to the SQL Server computer.

SQL [Business Intelligence Manager](#) identifies issues within the SQL BI environment to help optimize BI service performance. [Learn more](#) > >
