

# Log in to the IDERA Dashboard

Once you have installed and configured your IDERA Dashboard and SQL BI Manager deployments, you can log in to the web console by doing the following:

1. Open your selected Browser. Make sure it is compatible with the IDERA Dashboard [console requirements](#).
2. Type the IDERA Dashboard product URL: **http://<machinename>:<port>** where **<machinename>** is the name of your host or machine, and **<port>** is the port specified during installation. The default URL is **http://<localhost>:9290** or **http://<machinename>:9290**.
3. When the IDERA Dashboard web console launches on your browser, use your Windows user account **<domain\user>** with the respective password to log in to the product.

The screenshot shows the IDERA Dashboard login interface. At the top is the IDERA logo. Below it are two text input fields: the first is labeled 'Domain\Username Credentials' and the second is labeled 'Password'. Underneath the password field is a brown 'Log in' button. At the bottom of the form area is a blue link that reads 'Log on using Windows Credentials'.

When you log in for the first time, the IDERA Dashboard displays a Welcome Wizard, which allows you to configure BI Manager. [Click here](#) to learn more about the Welcome Wizard.

SQL [Business Intelligence Manager](#) identifies issues within the SQL BI environment to help optimize BI service performance. [Learn more](#) > >
