

## Specify permissions

In this window you can specify the SQLDM permissions you want to assign to the login. You can apply the following permissions to the specified account:

- View data collected for monitored SQL Server instances
- Modify configuration and view data collected for monitored SQL Server instances
- View data, acknowledge alarms, and control maintenance mode status
- Administrator powers in SQL Diagnostic Manager

Give access to the Web Application to the specified account, by selecting the Grant Web Application Access option.

## View Permissions

Logins with View permissions can view the data collected for the assigned SQL Server instances except where noted in the following table.

SQLDM Area	Cannot do the following
File Menu	Manage servers
Tools Menu	Configure default alerts
	Edit notification rules or providers

	Edit grooming options

## Modify Permissions

Logins with Modify permissions can edit basic settings for the data collected for assigned SQL Server instances except where noted in the following table.

SQLDM Area	Cannot do the following
File Menu	Manage servers
Tools Menu	Edit alert configuration
	Edit notification rules or providers

	Edit grooming options
Help Menu	Manage licenses
Alerts pane	Configure default alerts
	Edit notification rules or providers
Administration pane	Access or view Administration

## Administration Permissions

Logins with Administration permissions can access all monitored SQL Server instances and modify all settings including grooming options, notification rules, and providers, manage SQL Diagnostic Manager licenses, manage application security including the ability to add custom counters, and has the ability to add and remove SQL Server instances in SQL Diagnostic Manager.

You cannot edit or delete logins belonging to the sysadmin role on the SQL Diagnostic Manager Repository as they have SQL Diagnostic Manager Administrator privileges.

The SQLDM Console displays a message when a user with View or Modify permissions attempts to perform an action that requires Administrator (sysadmin) permissions.
