

# Server monitor reports

Server monitor reports provide an overview of your monitored SQL Server instances.

## Server Monitor Reports

### Enterprise Summary

Use the [Enterprise Summary](#) report to view the health of your SQL Servers.

### Server Summary

Use the [Server Summary](#) report to view the health of a single SQL Server.

### Active Alerts

Use the [Active Alerts](#) report to identify the currently active alerts for all monitored SQL Servers.

### Mirroring Summary

Use the [Mirroring Summary](#) report to view the health of your mirrored databases.

### Metric Thresholds

Use the [Metric Thresholds](#) report to view all metric thresholds for a SQL Server instance.

### Availability Group Topology

Use the [Availability Group Topology](#) report to view the current topology of an AlwaysOn Availability Groups configuration.

### Deadlock Report

The [Deadlock Report](#) lets you analyze deadlocks on your SQL Server instance. By analyzing you can better determine where deadlocks are occurring and what changes can have the greatest performance impact.

### Alert Template Report

The [Alert Template Report](#) displays the list of instances with Alert Template assigned per instance.

### Alert Threshold Report

The [Alert Threshold Report](#) displays all the metrics thresholds of the selected server.

### Template Comparison

The [Template Comparison Report](#) displays all the metrics thresholds differences between the Source and the Target Template.
