# **Server monitor reports**

Server monitor reports provide an overview of your monitored SQL Server instances.

## **Server Monitor Reports**

## **Enterprise Summary**

Use the Enterprise Summary report to view the health of your SQL Servers.

## **Server Summary**

Use the Server Summary report to view the health of a single SQL Server.

#### **Active Alerts**

Use the Active Alerts report to identify the currently active alerts for all monitored SQL Servers.

## **Mirroring Summary**

Use the Mirroring Summary report to view the health of your mirrored databases.

#### **Metric Thresholds**

Use the Metric Thresholds report to view all metric thresholds for a SQL Server instance.

## **Availability Group Topology**

Use the Availability Group Topology report to view the current topology of an AlwaysOn Availability Groups configuration.

## **Deadlock Report**

The Deadlock Report lets you analyze deadlocks on your SQL Server instance. By analyzing you can better determine where deadlocks are occurring and what changes can have the greatest performance impact.

## **Alert Template Report**

The Alert Template Report displays the list of instances with Alert Template assigned per instance.

## **Alert Threshold Report**

The Alert Threshold Report displays all the metrics thresholds of the selected server.

## **Template Comparison**

The Template Comparison Report displays all the metrics thresholds differences between the Source and the Target Template.
