

Activating a license

If you have acquired a license, you can quickly activate. Go to **Start > All Programs > IDERA > SQL Comparison Toolset > License Activation**. In the License Activation window, type or paste the license number you received, and then click **Activate License**. The license activate utility will connect to a web service running on our web servers that will validate the license you provided. Within a few seconds you should see a confirmation message indicating that the product was successfully upgraded.

Idera SQL comparison toolset - License Activation

SQL comparison TOOLSET License Activation
Activate Idera SQL comparison toolset license.

Request File

If you are experiencing difficulty activating the product, please follow these four steps:

1. Enter the License Number you have received into the "New License" edit box. If you are upgrading from an old version, you should provide a valid license number for that version.
2. Click on the "Generate Request File" button to generate an activation request file. You will be prompted to specify a file name.
3. Email the file to licensing@idera.com. We will generate a license activation file and email it back to you.
4. Once you have received the license activation file from us, you may upgrade the product using the option "Load license from file".
