

Export an alert response

SQL Diagnostic Manager allows you to export existing alert response actions.

To export an alert response:

1. Open the Alert Actions and responses window by selecting **Tools > Alert Actions and Responses** from the SQL Diagnostic Manager console menu. Select the notification rules that you want to export and then click **Export**.

 To export all your alert responses at once, click **Administration > Import/Export** from the navigation pane and select **Alert Response** in the export column.

2. In the **Browse for Folder** dialog box, indicate in which folder you want to save the alert response XML files.
3. Click **OK** in the "Alert response exported to selected directory" notification.

 **Import an alert response**
For instructions on importing an alert response, see [Import an alert response](#).

SQL **Diagnostic Manager** identifies and resolves SQL Server performance problems before they happen. [Learn more](#) > >
