Edit assigned instances

The Assigned Servers window allows you to change the SQL Server instances on which the login has permissions. To tag a server instance, select Server tags from the Tags drop-down list or add a new tag by choosing New tag from the list. Select the SQL Server instances on which you want the login to have permissions and click **Add** button to move them to the **Selected Servers** column. Click **Next** to continue.

SQL Diagnostic Manager identifies and resolves SQL Server performance problems before they happen. Learn more > >
