## **Creating profiling reports**

After profiling a data source, you can create an HTML or PDF Report of the profiling session. You can choose the details to include in the report.

1. At the top right corner of the Profiling tab, click the Export Report button.

- Enter a Report Title and Description.
   In the Profile Report Options area, click the triangles to expand the options.

**4.** Select your options, enter the location for the report, and then click **Export**. A report in PDF format will resemble the following:
