How does SQL Business Intelligence Manager help me?

It's one thing to know that the report your boss relies on is running slow or your ETL job takes all night. What's even better is to know **why** those things are happening. With SQL Business Intelligence Manager, you can take control of your BI infrastructure. Having insight into your SQL Server Analysis Services, SQL Server Reporting Services, and SQL Server Integration Services environment makes it easy to identify issues that can quickly be resolved to optimize your business environment.

As a state-of-the-art business intelligence management solution, SQL BI Manager provides:

- Broad visibility into SQL Business Intelligence services with over 140 metrics pertaining to the health and availability of the services and the servers they reside on.
- Dashboard views display data across the entire BI environment and provide drill down capabilities to obtain more details.
- alerting keeps you notified of the state of your BI environment so you can take corrective action as needed.
- Role based security makes it easy to give and restrict access, to SQL BI Manager, based on a user's role in the organization.

SQL Business Intelligence Manager identifies issues within the SQL BI environment to help optimize SQL BI service performance. Learn more > >
